Profile Summary

I'm a result-driven software developer specializing in building high-performance web applications. I have improved website performance by 40% by implementing critical CSS, optimizing core web vitals, and streamlining API calls.I have a strong ability to identify and resolve performance bottlenecks in web applications.

Skills

PROGRAMMING
JavaScript, TypeScript, HTML5, CSS, JQuery

FRAMEWORKS AND LIBRARIES
ReactJS, NextJS, NodeJS, ExpressJS, Bootstrap, Tailwind, MUI

OTHER TOOLS
REST API, Git/Github, AWS, WordPress, Woo-Commerce, Less/Sass, Figma, Framer Motion

Education

B.Tech in Mechanical Engineering,
MLV Textile & Engineering College | RTU
2015 – 2019
CGPA - 7

Interest

Travelling, Singing, Reading, Photography

Professional Work Experience

Software Developer, *DePronto Infotech*
2022 – present | Mumbai, India

- Developed responsive web applications using ReactJS, HTML5, CSS3, and JavaScript, ensuring cross-browser compatibility and achieving 40% improvement in load times in website speed as measured by Google PageSpeed Insight.
- Led the development and performance optimization of India's top-selling life insurance website, resulting in a 40% reduction in page load times and a 10% reduction in server load, focusing on performance optimization, API development and developing scalable web services.
- Effectively managed version control and facilitated teamwork using Git, CodeCommit, and JIRA, while also mentoring junior developers on ReactJS and best coding practices, resulting in a 25% increase in team productivity and 15% reduction in code integration issues.
- Led code reviews to enforce coding standards and best practices, leading to a 15% improvement in code quality and fostering a culture of continuous learning.

Research Analyst, *Arcgate Technologies LLP*
2021 – 2022 | Udaipur, India

- Managed and curated content for a leading food delivery platform, ensuring accuracy and a user-friendly experience for customers. Edited and optimized food item images to enhance visual appeal and ensure consistency with platform guidelines, leading to a 15% increase in click-through rates on food items.
- Ensured all content met DoorDash's platform guidelines and delivered high-quality results, contributing to a 20% reduction in content-related errors.

Projects

ICICI Pru iProtect Smart

- Spearheaded the front-end development and performance optimization of ICICI PruLife iProtect Smart, leading a team of 3 developers. By implementing critical CSS, optimizing core web vitals, and streamlining API calls, achieved a 40% reduction in load time, significantly enhancing user experience.
- Optimized existing RESTful APIs to enhance data exchange protocols, achieving a 25% increase in throughput, facilitating smoother interactions for over 1M monthly active users accessing the platform.

ICICI Return of Premium

- Developed multiple features to enhance user experience and make the flow more user-friendly, resulting in a 10% increase in user engagement.
- Led projects involving cross-functional teams, ensuring seamless collaboration and communication between departments to achieve project goals and deliver high-quality software solutions.
